French ★★★★★

English ★★★★★★

## HOBBIES

Manage a small portfolio invested in ETH, IOTA and OMG

9-month trip around the world in 2007/2008

Furniture, interior design, running marathon in 4 hours

## SUMMARY

In parallel of my 10 years of experience in market finance and asset management, I developed a strong interest in startup industry: I have launched a second-hand furniture market place, worked together with a Luxembourg based FinTech and had the opportunity to present to the previous CEO of BIL, a business plan I elaborated, which shed some light on the following question: "Is crowdfunding an opportunity for the BIL?".

More recently I changed the path of my career and acquired technical skills thanks to Le Wagon. I worked on several projects as a freelance and got the CSPO certification.

Building on these experiences, I have developed a skill set which I believe would not only bring an investor point of view but an entrepreneurial vision essential to the success of any venture.

This double experience as an ICT entrepreneur and a professional in the investment industry, combined with my strong communication and presentation skills will be essential to join your team.

## TECHNOLOGIES

### Back-end

Ruby Rails VBA
